

What is Dr.Web AV-Desk?

Dr.Web AV-Desk is a business model which will help Service Providers gain new customers, strengthen the Average Revenue Per User (ARPU) and significantly reduce support overheads.

Dr.Web AV-Desk is a new way of delivering complex Anti virus/Anti-spyware & Anti-spam protection as an IT-security service to all users across the Internet via Service Providers — the fastest growing distributors of IT-security solutions.

Dr.Web AV-Desk is a program software for centrally managed provision of IT-security services against viruses, spam and various malicious codes for an unlimited subscribers base.

Who can be interested?

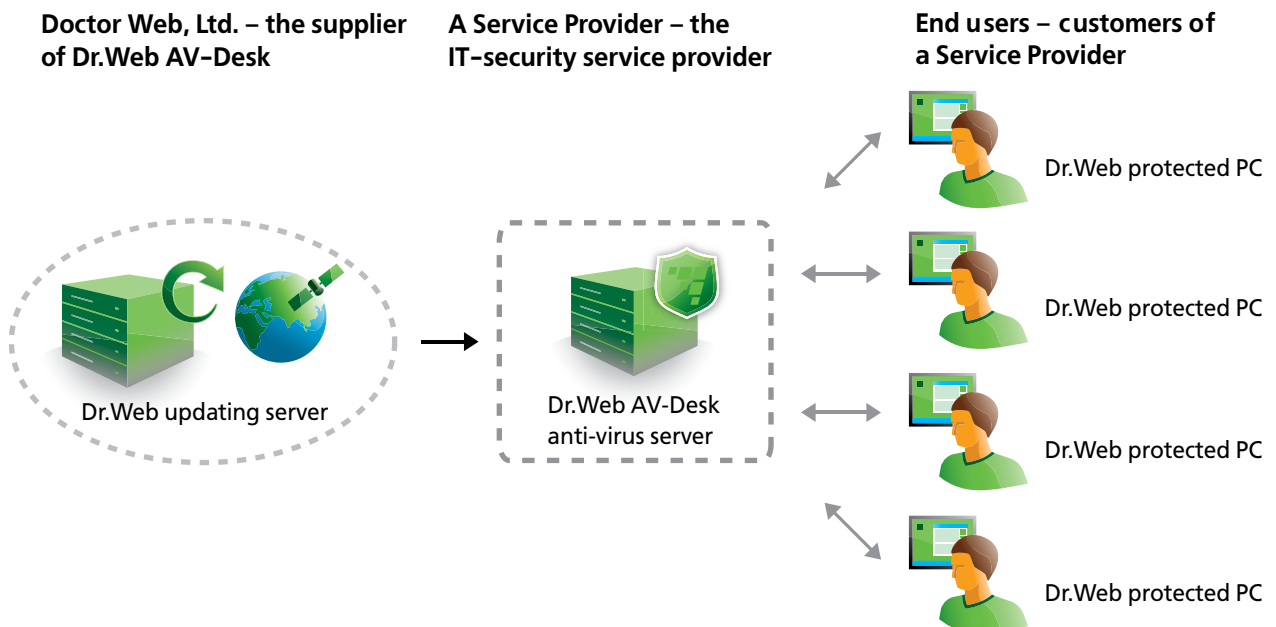

Dr.Web AV-Desk is flexible and scalable enough for all types of companies such as:

- ISP/ASP
- Security Service Provider
- Managed Security Service Provider
- Infrastructure Service Providers
- Data storage/Data recovery company
- Online Banking
- Hardware maintenance company

How does Dr.Web AV-Desk work?

Service Providers install the server software of Dr.Web AV-Desk in their networks. The installation package is installed on users' computers. For every subscriber of the security service a unique installation package is created — either manually by an administrator, or automatically (API for integration into billing systems are provided). The download link for the installation package can be displayed or e-mailed to a subscriber. A unique user identifier (UID) created by the server is stored in the executable file. When launched, the package is installed, updated and administrated in accordance with instructions received from the anti-virus server. Dr.Web AV-Desk console helps Service Providers' administrators easily manage highly dynamic and complex environment of the protected network, automate tasks, perform daily routines in just minutes, without any extensive time commitments — view and set up key parameters of anti-virus servers and protected clients, reconfigure anti-virus settings and run tasks on separate clients.

Why do Service Providers need Dr.Web AV-Desk?

Security investments with Dr.Web AV-Desk are much less than costs spent on the damage repair from viruses and increase of technical support services and call-centers stuff.

- Every Netizen is your customer!
- Best investment into IT-security of Your business
- Encouragement of new users take-up
- Security conscious company image
- Reduction of malware related threats and support overheads, increase of productivity/efficiency of hardware and employees.
